

The following explains how to log into the RHS Medical (secondary), Dental & Vision portal for first-time users.

Members log in at <https://rhs.org/yellow-card-sign-in/>. You will need a **username** and **password** to access your health claim information.

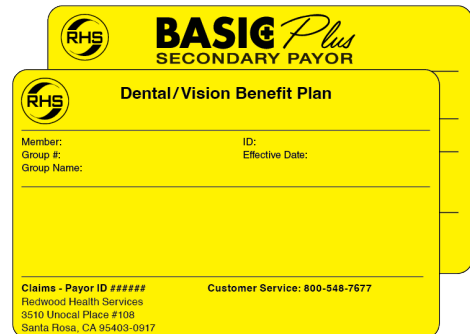

Your username is your **Social Security** number, or **ID# (found on your Yellow Card)**, and your temporary password is your **date of birth**. If using your Social Security number, enter it without dashes (for example, 123456789). The temporary birthdate password must be entered in MMDDYYYY format.

Once you have entered your username and password in the space provided, click on the login button to arrive at the **Health Claim Information**

Screen. Here you can personalize your login information and update your email address. Please ensure that you enter the correct email address in the Health Claim Information Screen so we can contact you if you forget your password.

If you forgot your password, you can click on the **Forgot Password** button and enter the information requested. A new password will be sent to your email address.

Note: your computer should have the most recent version of **JAVA** downloaded and installed to ensure trouble-free operation. You can find Java software and updates by clicking on the following link: <https://www.java.com/en/>.
